Richmond will enter a protest nothing unusual about the decision against the Tomasini bridge proof Herbert Hoover to speak in the ject to connect Albany and Marin south, when his personal interest county at the hearing before the

Richmond's protests claim that

Industrial Leaders Stand For Hoover

Washington, Oct. 5 - Democratic newspapers, which have published stories about the support given their candidate by the leaders of the automobile industry, overlooked a few names which have associated themselves with the candidacy of Hoover and Curtis. Among them are Henry Ford, Walter Chrysler, Alfred P. Sloan, Jr., president of General Motors, and W. C. Duraut. In that business, as in most others, Hoover has the backing of the generals, though some of the second lieuten ants are on the democratic side.

"His experience as engineer member has been varied and club? successful, and has really been a training for the presidency," says Henry Ford of Mr. Heover.

Another creative genins aligned with the republican caudidate is Thomas A. Edison, who says the Herbert Houver will be elected president "because he stands for the things a majority of the people are in favor ot."

H, A. Johnston's candidacy for member of the eastbay municipal ntility board is receiving the endorsement of Richmond voters and many throughout the district. He is receiving almost unanimous support in Contra Costa county.

Detroit.—The Ambassador bridge, panning the Detroit river between Detroit and the border cities of Can-ada, will be the largest suspension bridge in the world when it is com-pleted next-year at a cost of \$20,000, 000. The first physical contact between the two shores was celebrated with elaborate ceremonies recently when the two-mile bridge first reached Canadian soil.

The first spanning of the Detroit river was by means of a steel cable
1% inches in diameter which was
strung over the path to be taken by one of the two main supporting cables of the permanent bridge structure. The cable was lifted from the bed of the river, where it was placed a few days before, to the top of the two huge towers which will cary the bur den of the finished internationa

Nineteen Inch Cables. From this steel cable will be hung the working platforms from which the workmen will construct the 7,622 par-allel and closely compacted steel wires which will form one of the two main bridge cables. The same operation will be followed in the construction of the other main 19 inch cable.

Because of the size and importance of the Ambassador bridge, dignitaries from both the border cities of Ontario and Detroit were present at the

Mother Sees Boy for First Time in 49 Years.

New Orleans, La.—Separated 49 years by the wide gulf of Atlantic, a mother and the son she reared by mail now ar reunited.

Mrs. Mary Ann Tiernan Moonan has seen her son, George A. Moonan, Dublin barrister, for the first time since he was seven years old. Although related by the closest of blood bonds, they met virtually as

strangers.

The man barely remembered the mother who had left him with relatives in Ireland wher, she left that country to visit her father and moth-er, who had migrated to New Crieans. Moonan's mother never returned

She kept constantly in touch and directed his rearing by mail. On merous occasions she planned to go back to her native land, but as time sped on, the old ties weakened and the new ties strengthened.

It was fomorrow for her and tomorrow never came. But now this

slender woman of eighty-two is planning to sail for Ireland under

She would not come to him so he came to her. The mother had turned deaf ears to his cabled and written pleas to return to her native shores so Mochar came to plead his case in

person.

With the picture of her relatives waiting to receive her in old Ireland she capitulated, packed her belong-ings and is ready for the Journay. "Old scenes, old songs, old friends again," is the thought that is carrying Mrs. Moonan over the ocean.

Sea's Salt Plant Yields

Six Billion Tons a Year Leningrad, U. S. S. R.—Six billion tons of the commercially useful chemical, Glauber's sait, is made available each year by a natural evaporation plant on the eastern shore of the Casolan sea. This outdoor chemical factory, built

by the sea and operated by the sun, is the shallow, narrow-mouthed Guif of Kara-Bougaz.

Through its connecting strait,

which is only about 800 feet wide, the heavily saited waters of the Caspian flow in a steady torrent, for the high er rate of evaporation in the shallow gulf keeps its level about a foot lower than that of the main body.

During the summer the temperature all the saits in solution, but in win-ter the water temperature drops to few degrees above freezing, and according to the well-known laws of solution the least soluble minerals crystallize out first.

crystalize out first.

In this case the Glauber's sait is the only one that comes out; the others, principally common sait, sodium sulphate and magnesium chloride, resolute to existing. main in solution.

The Glauber's salt crystals settle on the bottom and are washed ashore by the waves. When they dry they are picked up by the wind and carried still farther from the water.

Navy Plane Scoops Up

Gold in Nicaragua Mine Washington.—Mining gold with an airplane is the most bizarre of all tales yet to come to the Navy department here from the marines in Nicaragua. Captain Howard, marine corps oilot, made a forced landing with an amphibian plane—so goes the sto in the jungle area near the La mine and his pontoon accoped up earth heavily laden with gold. Corporal Cole, observer aboard the plane, panned out \$100 worth of yel-low metal with ease, says the Managua report. The marconed aviators were rescued by other planes the fol owing day and were returned safely o Managua—with the gold as evi-

Scale Mount Baker

Fort Portal, Uganda, Africa.-The Chicago Geographical society expedi-Calcago Geographical society expedi-tion to the Mountains of the Moon, planted the American, British and Ex-plorers' club flag on the summit of Mount Baker, August 26. The climb and descent was attended by great hardship, the party having to con tend with snow storing most of the way.

Bees Hold Business

Section Two Hours Westwood, N. J.—This cown-suspended business for two hours when a swarm of bees took possession of the printpal corner, Westwood and Cen

pai corner, Westwood and Cen-ter avenues.

The first intimation came when Dr. F. C. Young hopped-into his car, and hopped right out again. He waited a while, but the bees refused to abandon his machine, and he had to don his machine, and he had to resort to a taxicab. Stores closed doors and windows, and the bees tried particularly hard to enter the Waller department store. Furtive individuals dart-

ed down the streets, but most of them were stung.

Finally an unidentified citimen, experienced in the ways of bees, brought a bive, mosquite setting and smokepot, and soon had the gwarm captured.

FIND SOUND WAVES THAT DEAL DEATH

California Scientists Conduct Successful Tests.

Berkeley, Calif. — Death dealing ound reves! An experiment in this strange new field has been successfully carried out by three University of California scientists.

They demonstrated that high-fre-

quency sound waves, emanating from a crystal vibrating at the rate of 750,000 times a second, will kill large

protozon.

So terrific and so instantaneous was the effect of the lethal sound w.ves, that the gill filaments of the protozon were torn from their bodies.

Strange fields of conjecture for scientific of the protozon were torn from their bodies. scientists of the future have thus been opened. Tell of Work.

Tell of Work.

A. R. Olson, associate professor in the department of chemistry, one of the experimenters, pointed out that previous xperiments had been conducted in this same field; that he and his associates, F.O. Schmitt, research assistant, and C. H. Johnson, teach. assistant, and C. H. Johnson, teaching fellow, have merely carried on the work to a higher degree of perfection.

Bencficial rather than destructive

results are more the goal of the local scientists. Bloodless surgery has been accomplished by the same meth-ods used to kill the microscopic or-

In carrying out the experiment. which was begun two years ago, they found it necessary to invent and to build much of their own apparatus. They perfected glass needles to carry the sound vibrations, the points of which were so fine as to be invisible

This delicate instrument was necessary because all the experiments must needs be carried out under powerful microscopes. They were exploring in a world unknown to the naked eye.

First a drop containing the protozes was placed on a microscopic slide and a glass cover laid over it. The slide was then laid over an oscillator dish. Sensitive Needle.

The oscillator dish contained crystal which was caused to vibrate by the passage of an electrical cur-rent through the liquid in which it was immersed.

In conducting the experiment with planarian worms, the glass needle was used. The large end of the needle was placed in the oscillator dish, and the point of the needle directed against the worm.

So delicate was this operation that the scientists used an extremely sensitive instrument, the micromanipula tor, with which to guide the needle. They discovered that when the needle point was placed against the worm, even though lightly, the vibrat-ing point instantly burned the worm. If the shauk of the vibrating point was placed across the worm, the body

would be severed. Other men have worked on this phenomenon of the effect of high frequency sound waves, it was ex-plained, but none have developed the technique to such a high point. With the glass needle as perfected on the Berkeley campus it is possible to observe the effect of sound waves not only on each tiny cell, but even parts of the cell.

Chinese Typewriter

Perfected by American New York.—A test of the compara-tive might of the pen and the sword in China, through the use of the mod-ern, rapid-fire evolution of the pen, is now made possible by an American invention. This is a Chinese typewriter. The machine is based on the newly adopted Chinese alphabet, known as "Chu Yin Tzu Mu."

The Chinese language is ideographic—that is, it presents picture ideas, but the Chinese typewriter operates like its English cousins. Its keyboard has 48 characters, comprising all the phonetic symbols, 21 compound signs, Chinese numerals, tone marks, a symbol indicating emphasis, parentheses and

a period.

The characters are set sidewise. To read such a sheet, it must be given a uarter turn after removal fro Maria Company machine.

Bid on Vast Store of Bone-Made Fertilizer

Tacquia, Wash.—Millions of dollars worth of seal and sealion bone deposits on the shores of the Priblion posits on the shores of the Fribuor falands in Bering sea, a vast store of government owned fertilizer available for practical use, is attracting local capital to bid for the privilege of re-

covering the product.

Although not fully nor officially surveyed, the accumulations of centuries form the largest tope deposits in the world, one of the piles being in the world, one of the pless being a mile joint by links a mile wide and fully six feet deep. Action of the and waves has formed the boues had not waves has formed the boues had not been sufficient to windrows, while, it is possible and covers equally as large deposits as appear above the ground.

2,000 Cats on Pay Roll

Le Harve, Two thousand pussy cats have been put on the municipal pay roll of Havre. Havre was over-run with rats, a year ago, many of them brought from all parts of the world by the hundreds of boats using the port. The municipality decided to rid the given of rates and hired cats to do it.

DR. CALDWELL'S THREE RULES

Dr. Caldwell watched the results of

Dr. Caldwell watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation is a mild vegetable compound. It can not harm the most delicate system and is not habit forming.

The Doctor never did approve of drastic physics and purges. He did not believe they were good for human beings to put into their system. Use Syrup Pepsin for yourself and members of the family in constipation, biliconness, sour and crampy stomach, bad breath, no appetite, heidaches, and to break up fevers and colds. Get a bottle today, at any drugstore and observe these three rules of health: Keep the head cool, the feet warm, the bowels open. For a free trial bottle, just write "Syrup Pepsin," Dept. BB, Monticello, Illinois.

He' was looking very sad and de-jected as he came into the office one morning, and the other fellows chipped

"What's the matter, Jim? Your girl

"What's the matter, Jim? Your girl turned you down?"

"Yes," came the dismal reply.

"Well, don't take it so badly," comforted Griggs. "A woman's 'no' often mens 'yes,' you know."

"Quite probably," came in even more unournful tones. "But this girl didn't say no—she said 'rats!"—Stray

SEASONABLE DISHES

our seasons are so variable it is hard to determine when summer ends and fall begins. We

usually have as un-comfortably hot days late in the season as any time during the summer. It is not wise to re-tire all the summer COL dishes, for they may

be much needed dur ing the fall months. This year cucumbers seem to be especially good and abundant. Try putting up some in this simple way:

Cucumber and Celery Pickles-Fill quart or two-quart glass jars with small sized cucumbers or if large cut them lengthwise into finger-sized pleces, arrange five to six stalks of celery and one or two small onions in each jar; when well filled with the vegetables fill with the boiling hot vinegar, using one quart of vinegar (if very acid dilute with water), one cupful of sugar and one-half cupful of salt. Seal the cans and put away for use in a week or two. Onlons as well as cucumbers may be sliced, if too large to serve.

Here is a simple mustard pickle which is especially good for those who can add the cuccumbers daily to the pickle. Use one gallon of vinegar, one-half cupful of mustard, one cupful of sait, two cupfuls of brown sugar.
Mix cold and put into a large jar. adding a quart or two of small cucumbers as they grow. Cover with horseradish caves and set away.

French Potato Salad.—Cut a large onlon into slices and put to cook in a saucepan with two to three tablespoonfuls of butter. Cook until very soft. In another saucepan cook four medium sized potatoes cut into bits; while they are cooking add a little of the potato water occasionally to the onion to finish cooking until tender. Mash the po-tato, add the onion and one quart of good milk, season well with salt and pepper and serve very hot. This makes

Stuffed Lettuce Hearts.—Take small heads of lettuce, remove the centers and fill with chopped chicken, mush-rooms, shredded almonds and tender celery, all moistened with a good may-onnaise. Serve garnished witth a bright red strawberry.

Chestnut Time.

Glaced Chestnuts.—Boll sugar and mater and the surrounded with whipped cream.

water until a heavy straw colored girup results, dip blanched chestnuts in the sirup and put to drain on waxed

Trimmings on Costumes for School.

Fall Outfits for

One of the problems of autumn is the selection of a wardrobe for the juniors. Clothes must be provided for them for school, for holidays and for home occasions. The principal choice, notes a fashion writer in the New York Times, seems to lie between one piece and two-piece costumes, both of which are proper for girls between the ages of six and sixteen, depending upon their size and type. Generally speaking, the two-piece is selected for school, the one-piece for home and for school, the one-piece for home and the most formal wear; but there is a

variety of exceptions.

Although the skirt for the autumn is less abbreviated than that in the is less appreviated than that in the summer style, it is still very short, and whatever ornamentation it has is grouped on the upper part, the skirt being for the most part left plain. Many attractive frocks of this lescription are shown in the autu collections. One, copied from a summer style, is of figured dimity, with collar, cuffs and patch pockets of plain linen. The original had plnk blossoms printed on a white back-ground and the trimming was of plain pink linen.

Another of the same sort is of dim-

ity with miniature dots of pale blue on white. It has a narrow turnover collar and bands on the sleeves, which are short and of white linen. A small panel in the shape of a shirt bosom is stitched in the front, and on each shoulder is clustered a triangle of smocking. Both of these models are being successfully reproduced in chal-lis and heavy creps for service and becomingness, one in French blue, the

bands Give Effect of Trim.

Applied bands are shown on great many of the frocks, serving to give an effect of trimming without altering the simplicity of the model. An excellent example is one made of navy blue crepe de chine printed with blue polka dots. The frock is perfectly straight in silhouette and has an inverted plait laid on each shoulder, front and back. Each is fastened at the top by a strap of navy blue cloth with flaring, pointed ends stitched to hold the plaits in place. Narrow cuffs and a turnover collar, which is finished with a frill of red crepe, are also made of the nave solution. made of the navy cloth.

Again, bands of cloth in a contrastng color are used to finish a little school dress of washable rosy beige printed with small geometric figures of brown. In this model a fold of brown cloth outlines the yoke and is appliqued as a panel down the front to the hem. There it is rounded in a scallop, from which scallops finish the bottom all around. A cluster of gathers held in the square of the yoke at each side gives fullness to the frock.

This model is varied to give a more chic appearance, with the collar and cuff appliques cut in battlements and the yoke shaped unevenly, with gath ers clustered at one side only. An other difference is seen in the back

Charming One-Piece Frock of Jersey Designed for Juniors.

where the skirt, slightly full, is attached to the yoke instead of the plain one-piece back, which is more

These school frocks of light, finely

165

Dimity and handkerchief linen, of hich some of the year-around school which some of the year-around school frocks for youngsters are made, are shown with smocking, fagoting, cross-stitch and other styles of needlework, in all white and in colors. Georgette and all the varieties of volle are widely used for children's school frocks and general utility dresses. The new tub volle and ninon are also in favor, since they withstand ordinary wear and tear and are abso-Girls Are Simple Younger Set Affects Plain

dinary wear and tear and are abso

untely proof against water and sun.
Moreover, in the present-day exceedingly plain designs they are economical of time and labor in laundering.
For all of the softer materials smocking is charmingly adapted and is much used. Genuine peasant pat-terns of needlework, in color on white, or one color on mother, are seen in simplified designs on frocks for small girls and are always decorative, even quaint. A few models from Paris of dark-colored volles, mostly blue, show a touch of needlework or colored

a touch of needlework or colored floss, and edges embroidered with hand scallops. Straight-line silhouettes prevail in most of the models for school dresses, especially in the one-piece. A few circular and flaring skirts with godet are shown, but the greater number

leasing Frock of Brown Velvet for More Grown-Up Junior.

are plaited on "the straight of the are platted on "the straight of the goods" in kilts or box platts. In one collection brought from Paris are a number of models of wool fabrics, designed for a girl of eight or ten or older. All of these are quiet in cotor and simple in style, the sort of clothes that answer the requirement for all-day and every-day wear.

Amont the two lices models is one

Among the two-plece models is one of leaf-brown wool crepe. Though it has a belted overblouse this little suit is gently feminine in style and has a bateau neck ending in two narrow scarfs that are tied in a bow at the back. A detail of fagoting is introduced in the bodice with lines that radiate downward from the neck, front and back. Another model in front and back. Another model in brown is more elaborate. A short bolero is added to the blouse and the skirt is trimmed with five narrow tiers that are clustered into frills at one side. This dress is made of flat crepe, with ivory crepe de chine for the blouse, which has the effect of a guimp or vest in front and shows softly a contrast in color all around.

A two-piece of red and brown wool plaid is particularly chic, with box-platted skirt and a norfolk jacket belted with a strap of brown suede. With this and other models of the sort a small eton collar of white pique is stitched along the edge with scarlet varn.

Beige and Red Wool Mixtures.

A modernistic note is reflected in a one-piece coat frock of beige and red wool mixture. The lighter weave of part of the frock, and for the lower part the darker weave, showing more red than beige, it attached in geometric outline. A narrow belt of lacquered red leather and collar and

A similar collar and cuff set is shown with a one-piece belted frock of wool crepe. Several new two-piece and simulated two-piece frocks are shown in wool jersey, in one of which braid is added as a trimming at the top, and in the other in battlement porder around the bottom. Tweed of border around the bottom. Tweed of a rich shade of tan has a woven border of red, green and blue, which is arranged to form a trimming for the bottom of the skirt and a yoke on the blouse. A trim and dainty appearance is given to the wool and Jersey frocks with collars and cuffs of linen or plque, usually detachable. Some are handsomely embroidered and all are handsomely embroidered and all are finished with a scallop or crocheted edge done by hand with white cotton or colored yarn.

Delightful pajama suits are made of crepe de chine in plain colors and figured goods. A suit of white crepe printed in the small pink flowers has short sleeves and a finely of plain pink crepe as a rim on the edge of the coat, sleeves, trouser cuffs and ends of the soft sash.

How many people you know end their colds with Bayer Aspirin!
And how often you've heard of its prompt relief of sore throat or tonsilitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these der is that anyone sun worres through a white tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have told you Bayer Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

His Range of Vision Affected by Silver

A parable taken from a Jewish folk-lay runs as follows: "One day a certain old rich man, of a miserly disposition, visited a rabbl who took the rich man by the hand and led him to a window. 'Look out and led him to a window. 'Look out there,' he said. And the rich man looked out into the street, "'What do you see?' asked the

"I see men, and women, and utile children, answered the rich man. "Again the rabbi took him by the hand, and this time led him to a mirror, 'What do you see now?'
"'Now I see myself,' the rich man

Then the rabbi said: 'Behold-in "Then the radol said: "isenoid—in the window there is glass, and in the mirror there is glass. But the glass of the mirror is covered with a little silver, and no sooner is the silver added than you cease to see others but see only yourself."

For the Baby

To protect the baby from disper rash, dispers should always be washed in a solution of 20 Mule Team Borax. forax neutralizes the acids, and removes all traces of soap which may irritate the baby's tender skin.—Adv.

New Fire Extinguisher Two Ohio chemists were as much mystified as anybody recently when they discovered that solutions contain-

ing salts of alkali metals, such as poing saits of alkali metals, such as po-tassium, can put out a fire three times as rapidly as standard soda acid types of extinguishers. Their apparatus, says Popular Science Monthly, puts out a blaze in 12 seconds. The best previous record was from 35 to 45 seconds.

Living River Dredge The hippopotamus tears up and eats the great plants and weeds that grow in rivers, thus acting as one of na-ture's great dredges.

A flag made up of stars and stripes owned by Mrs. Robert D. Rose, of Portland, Maine, is unusual in that the stars are arranged on the blue field so as to form the letters F-R-F-E. The word is composed of 35 stars, while the 36 is larger and placed below. This flag was carried by George Demry in a parade of school children on the Fourth of July, 1865.

FRIDAY, OCTORER 5, 1928

Having worked with his band . Herbert Hoover knows something about the other fellow who works with his hands.

Herbert Hoover was born and raised in the country and knows something about the farm. Alfred R. Smith was born in New York City and knows nothing about the presidential candidate taken at about the farm. And so it seems settled that the time of his mother's death. the men and women on the farm know to whom to look for solution of their problems.

Speaking of issues, there are ilways enough to go around and the people can decide as they see fit which is paramount. In this campaign, however, "A job for very man" is doing quite a basness for Hoover and Curtis.

It might be well, in this presdential campaign, to confide to governor Smith that national issues are at stake. The governor's campaign thus far has consisted almost entirely of "replies" and "denials" of matters iconcerning New York

A vote for a protective tariff is a ote to protect American payrolls. A vote for a competitive tariff is a vote to put American labor in competition with the cheap labor of Europe.

The home being the, foundation of this country, Herbert Hoover is the man to protect it. He knows

The election of Hoover means relief for agriculture.

Friends of American shipping will have a friend in Hoover.

A Richmond merchant staged a novel advertising stunt. He anionneed that he would open on a certain day with two bowls of punch, one labeled "Hoover" and one "Smith." And what do you think happened? The Hoover bowl went dry in a few minutes, and Al's bowl is still there filled to the brim. This beats the straw vote 'test.'' Now, Hoover's punch had no kick in it-not the kind you are thinking of.

Now Be Honest

Laugh at the houry old custom we you will, but probably even now your subconscious mind is toying with a good resolution or two.—Womsu's Home Companion.

Hats Resemble Houses

Hats Resemble Houses
In the Hawalfan islands, long before the Inhabitanist took the trouble
to clothe themselves, they built grass
houses, and at the present time the
characteristic Hawalfan hat is remarkably like the hut.

The turbanalof the dignituries of
the England shape and grail of the

The turbing of the dignitaries of the Eastern church are still of the shape of those were by the high priests mining the Jews of olden times, and they are extraordinarily like the and they are extraordinarily like the characteristic slowes that surmount mosques. Again, it is pointed out, the high pointed spires of flothic churches were cotemporaneous with the high horn-like headdress known as the hendrin. It is believed, that the results may be found after a comparison of other styles of architecture with the headgear of the period wherein they flourished.—Washingtop Stur-

Quills Long in Use Quills are supposed to have been used for writing pens in the l'ifth century, though the coalecture rests mainly on an anecdote of Theodoric, king of the Ostrogoths, who, being so illiterate that he could not write even the initials of his own name, was provided with a plate of gold through which the letters were trut, and, this being placed on the paper when his alguature was required, he traced the letters with a quilt. The date of the earliest certain account of the medern writing pen is 650. The next no tice occurs in the latter part of the same century, is a Letin sounct to a pen by Aldheint, a Saxon, author. Steel pens were first made by Wise, in England, in 1800.

Hoover At Ten

Longest Bridges

In estimating which is the longest bridge in the world, the length of the main span is usually considered, with out the approaches. The Quebec cantilever bridge over the St. Lawrence, L800 feet main span, is the longest. The new Delaware river bridge between Philadelphia and Camden, 1,730 foot span, is the longest suspension bridge in the world. If approaches are considered, the Ket pronches are considered, the Key West extension of the Florida East Coast raffrond, a 30-mile vinduct, is perhaps the longest. The Litch cup-off across the Great Satt lake is 20 miles long. The Cerno Voda oridge over the Danube at Constanza is 12 miles long.

Not Original Draft

The fate of the original draft of the Declaration of Independence is not known. It probably went to the printer on the day after the declara-tion was adopted. The engrossed copy which was ultimately signed by the members of the Loutinestal con-recess was formerly in the archives. or the Continental con-gress was, formerly in the archives of the State department, but is now preserved in the Library of Congress. There, protected against handling and talurious light, it is now constantly on public view.

Odd Power of South

American Vampire Bat

American Vampire Bat
In his spory of his explorations in
South America, Dr. William Meclowern has something to tell use about
the dreaded vampire but.

Bats are not helleved to possess any
saftra which could are us a local anesthedic; and yet it is a fact that
they can insert their long teeth and
suck out the blood of their victims
without awakening them. Not a shotle suck out the blood of their victims without awakening them. Not a single case is known in which a sheeper had awakened while the vampires were at their work. It is also very circled that the hits never attack a personal in its awake, however sitent and motionless he may be.

He writes interestingly of the Amasonian medicine men.

The Indian medicine incit are no double charlatans in many respects.

nonian medicine men.

The Indian medicine men tre no fleubé charlatans in many respects, but many of them are certainly possessed of really remarkable powers. They appear to know a great deal more than most Europeans about massage, and they are unquestionably acqualisted with the nature jind use of many strange herbs, drugs and potsons, it is also highly probable that these men are more than superficially acquainted with principles of hypotisms.

River Under Ground

River Under Ground
Lost River is a name given to a
deep gorge where the water of the
Moosilauke Branch brook disappears
from sight, and at times from sound,
for a considerable distance under massive bowlders. It is the third great
natural wonder in the Franconia
nonnations, standing next after the
Profile and the Flume, far surpassing
the latter in its surprises, its massive
rock agrethecture, and unique in its
durk, gloony caverns. The gorge itrelf is about one-half mile long, 20-30
rolds wide and 40-75 feet deep to the rods wide and 40-75 feet deep to the trook bed. It was discovered in 1885

And It Would Always

Be "Just Like Home" my dear," said the young wife, "don't let us quarrel like so

"Yow. my dear," said the young wife, "don't let us quarrel like so many other couples. You know all we have to do is to avoid the first quarrel and then there pever can he any."

"Of course," the young husband agreed, "but you stubbornly persist in boarding at a botel, although you know I can't endure hotel life and want a home of my own."

"We differ on that adbject, to be sure; but that is a small malter. Why not compromise?"

"Certainty, if you can suggest a way."

"Nothing is serier. We will board at a hotel, and every evening when you come home I'll complain about the hotel help, just as if they were our own, and no doubt the proprietor will agree te let me discharge, one or two occasionally und you can meant the morning of new open, just as it we were beening house, you know."

Fatal Auto Crash

Ernest Swan, 52, of 228 18th street and Stephen Shellhammer. 24, ot 64 34th street were killed and Jack Russell of 210 Pirst street and Louis Voss, 2828 Bamond ave nue, were injured in an automobile ollision on the state highway near Rodeo Monday Morning.

Far-Fetched Reminder

Brother and sister were sitting on the creek bank, fishing. Sister threw out her Hine with a new halt and it became entangled in some brush. She nt once appealed for aid in recovering it. Brother drew it in, dragging some debrits with it.

"Where's the ligger?" she asked.

"The what?" from he, who had now mathead the floater was gone.

File—er—what.yon-may-call it, the—ich, you know, the Irish county."

"Oh, the cork!"

"Yes, yes," she replied, "that's it?"

Ability

A former called on the notary in the village and had a deed made authentle.

The charges for this service which only took a very few minutes seemed exorbitant and the farmer expressed

himself.

"Well it's like this," raid the notary.

"We professional men have to charge for our ability."
